To **JAMIE GOODE** who honors and entrusts me to do this task of research and Communication that I love so much,

My colleague **Ralph AKWEI** who ensured the presentation,

**ICCHNR** for accepting our participation in the conference particularly

**SALLY KENDALL,**

**ROS BRYAR,**

**PATRICA WILSON** and many others of which we shall not be able to cite the names

To **MARY Mc Clymont** for funding for travel to South Africa.

## **PLAN**

### **INTRODUCTION**

#### **I. OBJECTIVE**

##### **1. PRINCIPAL OBJECTIVE**

##### **2. SPECIFIC OBJECTIVE**

#### **II. PRINTING AND ACHIEVING RESULTS**

##### **1. PERSONAL IMPRESSIONS**

##### **2. WAY IN WHICH THE OBJECTIVE ARE ACHIEVED**

##### **3. DESCRIPTION OF RESULTS**

#### **III. PLAN FOR LIVING**

## **INTRODUCTION**

The seventh conference of International Collaboration for Community Health Nursing Research in which we took part, took place in South Africa, Johannesburg in the walls of the Montecasino from the 20<sup>th</sup> to the 22<sup>nd</sup> of September

2017. The opening of the meeting was carried out by the delegation of representatives of ICCHNR. In this report, we will make the link between targeted and reached objectives at the conference, our expectations, our impressions and future perspectives.

## **I. OBJECTIVES**

### **1. GENERAL OBJECT OF PARTICIPATION**

Contributing to new challenges and contributing to innovation in community health nursing by exposing our experiences during our consultations.

### **2. SPECIFIC OBJECTIVES**

- Acquire new knowledge and learn from the experiences of colleagues from other countries.
- Make up to date our knowledge and especially to make research in progress and improve the delivery of care in order to perfection
- Make the NGO VISION TOGO known Application for grants for community nursing

## **II. PRINTING AND ACHIEVING RESULTS**

Our best impression is despite the great shift that exists between nurses from Africa and Europe; there is a willingness to exchange in order to bring us to the challenge. We were very impressed with the presentations of each other. Nursing research is therefore very important and therefore we would like to participate more in this very enriching conference in order to have new experiences and knowledge.

### **1-PRINTING ON CONFERENCE**

This meeting of exchanges and sharing allowed us to realize that it is very important to do research to advance the profession nurse.

### **2- ACHIEVING THE OBJECTIVES**

We can say without doubt that the objectives of the conference were reached 90% in the measure where all the speakers have the same understanding about research and action for change.

### **3- DESCRIPTION OF THE RESULTS**

At the end of this conference, we were able to get to know the responsible for the conference; also we have woven new relationship with fellow nurses and nurses. All the presentations always make it possible to draw new knowledge and practice on the profession nurse. Nowadays, nursing research is very important in order to shortening the gap between nurses in under-developed countries and developed countries on the one hand and nurses and doctors.

### III. PLAN FOR THE FUTURE

This discussion of knowledge sharing event is to be encouraged in this conference is a great opportunity for nurses to evolve. We would like more time for our presentation. For the upcoming year we hope to always have ICCHNR's invitation for new conferences as planned. So we have already started further research and the drafting of the communication for the 2018. We would like to discuss either the management of fever in children in Togo, or on nursing measures to combat malaria in community settings. Here are some pictures of our future presentations: Here is some children who always cross lakes to access schools and centers health.

## CONCLUSION

In the end, this seventh ICCHNR conference was a success and very encouraging. All presentations were very rewarding. We hope have the invitation next year to gain more experience and also to share our nursing expertise in community settings in our respective countries
